

MODEL # 1068024

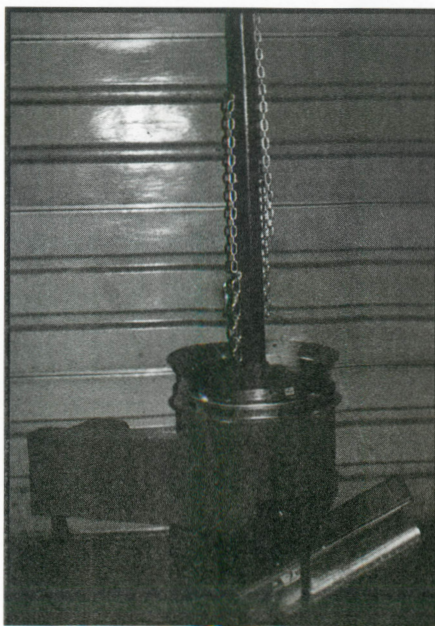

Worm Gear Drive

- For bins 6'-9' diameter
- Stems extend 34"
- Shaft size 1 1/4"
- Center post rotation 275 rpm
- Unit requires 1 - 1 1/2 hp motor
- Outside belt drive with guard 24" min. under bin clearance

MODEL # 1068030

Worm Gear Drive

- For bins 12'-16' diameter
- Stems extend 48"
- Shaft size 2"
- Center post rotation 125 rpm
- Unit requires 1 1/2 - 2 hp motor
- Outside belt drive with guard 28" min. under bin clearance

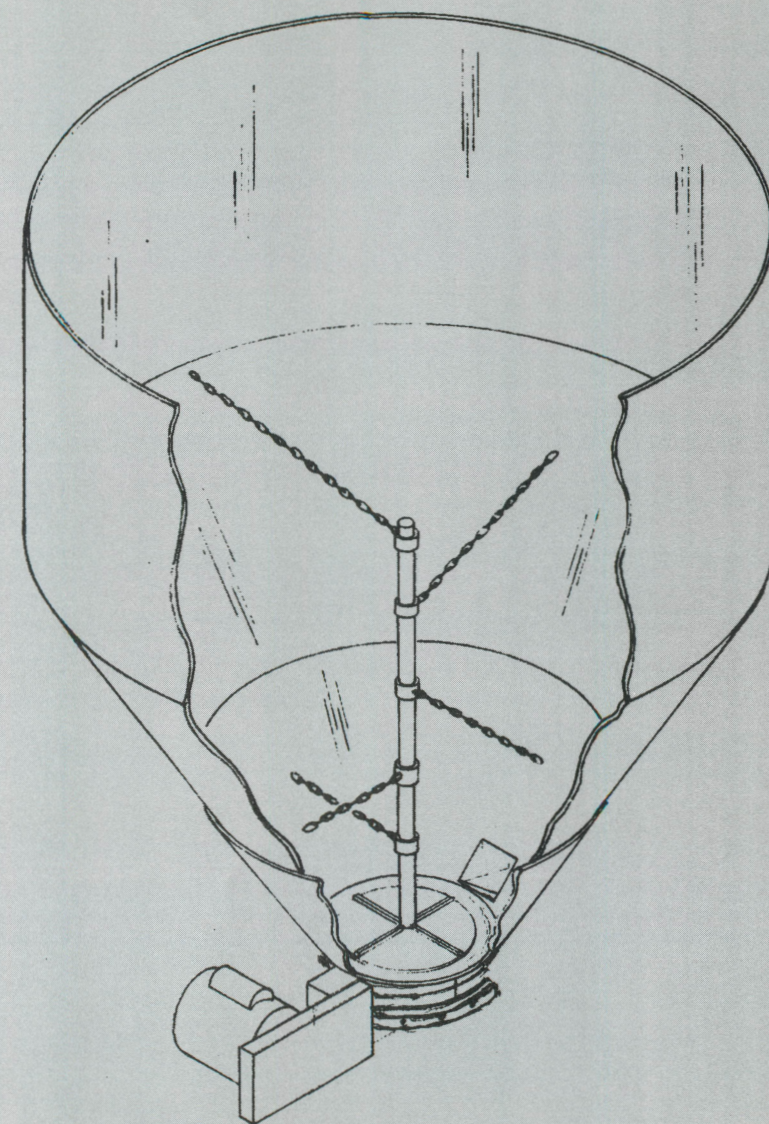

Study this cut-away view of the . . .

These durable construction features assure you many long years of trouble-free operation.

- designed to fit any size round bin
- easily and quickly attached, from OUTSIDE, to bulk bin hopper
- steadily unloads an even flow of any type feed
- center shaft rotates at 275 rpm
- chains swing out by centrifugal force
- spinner disc at bottom feeds directly into unloading auger
- weather protecting belt shield
- worm gear transfer case with V belt/pulley drive
- belt adjustment can be made without interfering with belt shield or other parts.
- use standard 4" or 6" augers on unloading boot.
